

# ISAAC L.

*Diligent, Disciplined, Confident*

"99 percent of the things you  
worry about happening **will not**  
happen, be **confident.**"

- Kim Lo

## BIOGRAPHY

As a part of the 49ers STEM Leadership Institute (SLI), Isaac has been working on his STEM based skills and knowledge for the past several years. He competed in his first robotics competition when he was a 7th grader and has been pursuing this passion ever since. His experience in robotics has formed him into a promising engineer with creativity and an ability to lead a team. Isaac's pursuit to better himself has led him to attend local community college math, science, and business courses that are not offered at his high school. With an interest in giving back to his community, Isaac is a math peer tutor at his high school, and is involved in a locally based non-profit organization that focuses on providing education to underprivileged youth in China. In his spare time, Isaac enjoys expressing himself through drawing, practicing martial arts, designing mechanisms, and playing badminton.
