

AADHIDHYA R.

Hardworking, Quiet, Curious

"**Insanity:** doing the same thing over and over again and expecting different results."

- Albert Einstein

BIOGRAPHY

Over his years in the 49ers STEM Leadership Institute, Aadhidhya has developed strong interests in engineering and computer science. In robotics competitions, he gained technical experience by applying physics and CS concepts to the building and coding of the teams robot. In his recent internship with FullCast, he learned how to use Golang to manage concurrent SQL calls to a database to speed up changes to a database (rather than using a single-threaded program). When he reaches college, he hopes to major in Electrical Engineering or Computer Science. In his free time, you'll likely find him listening to music, playing chess, or learning CS algorithms.
