

Udita M.

Adventurous, Adaptive, Reliable

The most **certain** way to
succeed is always to try just **one**
more time.

- Thomas A. Edison

BIOGRAPHY

Udita has been a member of the SLI community for the past six years and is grateful for the time and memories she has with her peers and friends. Udita has always been inquisitive, whether exploring emerging technologies through robotics or discovering people's capabilities to connect with others and the environment to improve the community. Through her constant drive to learn and diligence, Udita has found a passion for electronics and wishes to pursue a future in that field.

Outside of school, Udita enjoys participating in various extracurricular activities. As a varsity tennis player, basketball player, and swimmer, she has grown as a leader and received awards. Udita has learned how to utilize the 3D printer, Laser Cutter, and Raspberry Pi alongside various handheld tools as part of the FTC and Synopsys Science Fair project to help reduce injuries if a person falls off a balcony. Udita has been a TA and helped teach underclassmen how to utilize lab equipment and assisted during open-lab hours to help create personal and school projects. Aside from these activities, she always listens to music or spreads kindness in the community, one person at a time, to build a better tomorrow.
